Number of available position: 2

General information:

Location: **Austria**

Form of employment: **full time**

Type of contract: **permanent**

Minimum gross monthly wage (Euro): **3.300**

Job description:

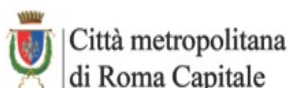

The employer works in the field of fully automated intralogistic solutions. The system they provide is a modular kit, which enables them to develop a tailor-made solution together with the customer that covers the complete material flow without any interfacing. The system can be configured to any unique situation, to allow for the transportation of everything from simple cartons and boxes to custom parts. The core is formed by the intelligent, autonomous Robotic transport carrier and a flexible track system that enables you to reach any location in the company. As an independently-acting swarm robot, the Carrier is able to deliver its load to any required destination on the track by the shortest path possible.

As Software Developer .NET C# you will:

- be responsible for the concept, design and development for the customer interfaces.
- be responsible for the development of the basic modules for the “transport order management” and the visualisation of the transport robot system.
- expedite the employer’s development process with your new ideas
